

**How to  
Use This  
Document**

This document is intended to summarize changes to the BeRx National Preferred Formulary that will go into effect as of 4/1/2019 and 7/1/2019. Positive changes will be effective 4/1/19 for all Members. Negative changes\* will be effective on 7/1/2019 for all Members who DO NOT have claims history for a medication listed below. For Members who DO have claims history for one (or more) of the medication(s) listed below, the associated negative change will be effective 7/1/2019. For all other medications not listed below, refer to the January 2019 BeRx National Preferred Formulary for information on formulary status.

*\*For TX and LA plans: State laws in Texas and Louisiana require your plan to cover your medications at your current benefit level until your plan renews. This means that if your medication is taken off the drug list, is moved to a higher cost-share tier or needs approval, these changes will not go into effect until your renewal date.*
